

Lero Industry Workshop Series Agile Methods for Start-Ups

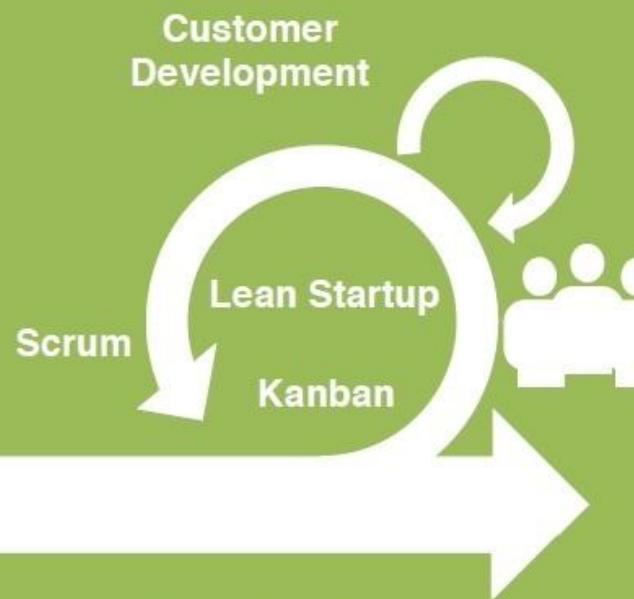

Wednesday 7 May 2014
Time: 10:00 – 13:00

Location:
Lero, Tierney Building
University of Limerick

RSVP:
dara.oconnor@lero.ie

AGILE SOFTWARE DEVELOPMENT methods are widely adopted in the software industry. They enable startups to describe product requirements, build iteratively and deliver continuous customer & business value. This industry workshop features **experienced practitioners** who have been pioneering the use of agile methods in large and **small companies** in areas such as collaboration, web-applications, telecommunications, real-time systems and databases.

Expert Speakers

GERARD HARTNETT has broad industry experience from MongoDB (agile big-data), Goshido (agile project management & collaboration) & Intel (software architect). He has helped a spectrum of companies from startups to multinationals to deliver with agile.

COLM O'hEOCHA has helped many companies adopting agile methods including: Intel, Ericsson, HP, Openet, Payzone, Openjaw, PaddyPower Duolog, Akari and SoftCo. Colm is an approved supplier to Enterprise Ireland's "Lean Business Offer" support fund.
